### **ROLES -TASKS OF PARTNERS**

Thessaloniki Tourism and Marketing Organization, appointed as the Lead Partner, has the overall responsibility for the whole project (financing contract signing, implementation supervision, submission of progress reports, care for the eligibility of the expenses, funds transfer and record and storing of the documents).

The Regional Agency of Economical Development of Blagoevgrad and the "Savremie" Association are responsible for the actions assigned to them, for the qualitative and timely submission of the respective deliverables and the sound management of the funds allocated to them.

The allocation of packages and actions takes into consideration the requirements of the project, their vivid interest on a particular action or area, but also the capability of each partner to support the implementation.

Under the precondition of the joint implementation, special emphasis was given to allocate the tasks so that all partners contribute to each work package by becoming responsible for individual actions of a package, avoiding, though, duplication of their functions. Particularly, Thessaloniki Tourism and Marketing Organization, due to its past project experience and structure, is responsible for the management and coordination WP, sharing the project meetings' holding with its partners, for the information and publicity WP, sharing some promotional activities, and for the Market & Stakeholders Conversation WP. In the latter, all partners undertake the preparation and the running of the platform, contributing with their capabilities. The Regional Agency of Economical Development of Blagoevgrad is responsible for the WP on the Social Media & Networking Trainee Centre, although all partners equally share their conduct.
